

# Wireless Hot Spots Available @ MCL Branches

(updated 7/23/15)

**The Mercer County Library System is pleased to announce that our free wireless service at the Hopewell, Twin Rivers, West Windsor, Hickory Corner, Hightstown, Ewing, Robbinsville and Lawrence Headquarters Branches has been updated, reconfigured and strengthened.**

Wireless internet is a free service provided by the Mercer County Library System and the New Jersey State Library. The wireless service has now been integrated with the library system's internal network, which will allow patrons to access [the many databases and online resources to which the library subscribes](#). In addition, the wireless signal has been boosted in order to reduce or eliminate "dead spots" within the library.

The wireless Internet is provided to the general public free of charge and is available throughout the building to anyone who has a wireless ready notebook computer or handheld device.

The wireless Internet is available for use during library programs and in the library community room, as well.
